ABSTRACT

Teachers’ Concerns, Challenges and Coping Strategies: Implementing CVQs at Baker Secondary School in Central Trinidad

Stacey Nidhan

This study examined the challenges and coping strategies of teachers in the implementation of the Caribbean Vocational Qualifications (CVQ) curriculum at a secondary school in Central Trinidad. Data were collected through interviews with five teachers, as well as through a questionnaire. The findings revealed that implementation of the curriculum was stymied by: 1) lack of resources, 2) lack of infrastructure, 3) time constraints, 4) inadequate training, 5) insufficient funding, 6) lack of capacity building, 7) poor perception of the CVQ, and 8) a paucity of student literacy. As a result, the teachers employed coping strategies to overcome these challenges, such as using their personal equipment and sharing classroom space.
